

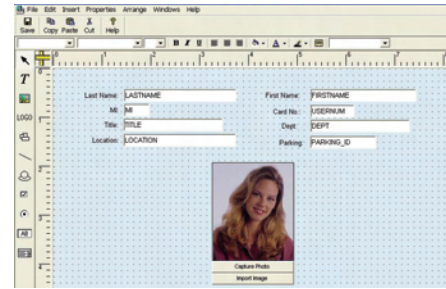

Photo I.D. Badge Making Kits

SK-EZ/IDKIT1 - SK-EZ/IDKIT2 - SK-EZ/IDKIT3

SK-EZ/ID Software

SK-EZ/IDKITS are complete packages that include everything you need to begin making color photo identification badges using your access control cards. SK-EZ/ID software has been specially designed to integrate with SK-NET™ access control software, eliminating the need to input data in two separate databases. Easy-to-use badge design templates are provided, as well as all the tools you need to create your own special look.

Each kit includes a quality Magicard printer, covered by a comprehensive warranty*. SK-EZ/IDKIT1 includes the Rio 2e printer, capable of producing single-sided, four color badges in less than 20 seconds. SK-EZ/IDKIT2 comes with a Tango 2e printer which makes duplex (two-sided) badges in only 48 seconds. SK-EZ/IDKIT3 includes the Alto printer, designed for lower volume applications. The Alto is hand-fed and prints a single-sided badge in 30 seconds.

Every SK-EZ/IDKIT includes a webcam, cables and a YMCKO ribbon to get you started. Magicard printers and accessories, custom "Holokote"

logo watermarks and SK-EZ/ID software are also available separately in single user or client/server versions.

* Standard warranty is 12 months. In North America and the E.U., however, a three-year "UltraCover" warranty is provided, including replacement print heads and use of a loaner if the printer requires repairs.

ALTO PRINTER

RIO PRINTER

TANGO PRINTER
