

Important Announcement About the Radio Key® RK100M

July 2007

The Radio Key® RK100M stand alone proximity access control unit has been phased out.

However, the new release of the popular **RK-65K** has the ability to be converted to RK100M operation. *If you ever need to replace an existing RK100M, or expand a system that uses this reader, you will be able to do so using the new RK-65K. See the operating manual for details.*

Consolidating these two products will help Secura Key to keep adequate inventory of the readers you need at a price that you like.

Make sure to order the correct cards/tags for the reader you will be programming:

- | | |
|----------|--|
| RKCM-xx | Standard molded card. Lowest cost, most durable and best read range. |
| RKCI-xx: | ISO-standard thin card. Used with dye-sublimation printers. |
| RKKT-xx | Key tag. |
| -01: | Random numbers, no facility code. Used with RK100M. |
| -02: | Sequential numbers, with facility codes. Used with RK65K. |
